High oil prices always get headlines.

Investors may worry that high oil prices could derail the strengthening economy. However, we believe the economy is strong enough to absorb higher oil prices. With no further production disruption, oil prices wouldn't likely rise much more and could reverse quickly. In that case, any impact should be small, not severe, so investors shouldn't overreact. While headlines from the Middle East represent a risk, a well-diversified portfolio is designed to navigate risky waters and help you toward your long-term financial goals.

Are you taking advantage of asset allocation?

The Value of Asset Allocation

Asset Allocation refers to the way you spread your investments among various investment categories. Proper asset allocation can help you better work toward your long-term financial goals. Edward Jones has developed suggested allocations for various Portfolio Objectives based on investors' circumstances.

This graph compares your Edward Jones investment and retirement account(s) investments to your Portfolio Objective. Through a comprehensive portfolio review, your financial advisor can help you assess your financial goals, select an appropriate Portfolio Objective and identify the specific investments that should be included in your portfolio based on your specific situation. In addition, adjustments to your asset allocation will be influenced by your unique circumstances, including risk tolerance, time horizon, tax considerations and future investment or distribution needs.

Some investments may be allocated to more than one investment category based upon estimates by Edward Jones or objectives outlined within the fund's prospectus. Actual allocations change over time and can differ significantly.

(This graph includes all the assets in accounts listed under "A Unique Understanding of Your Financial Needs" on page 1 of this statement.)

We hope this overview of your relationship with Edward Jones provides useful information as you consider your financial decisions. Information reported from this point forward is specific to your individual investment and/or retirement account(s).

Please refer to the important information and disclosures on the last page of this package.

Your Estimated Interest and Dividends

The following is an estimate of the interest and dividends you can expect to earn on your investments in the next 12 months but it is only an estimate and cannot be guaranteed by Edward Jones or the issuers of the securities. The estimate is known as the Estimated Annual Income or EAI. It is based on past interest and dividend payments made by the securities held in your account. It is also based on statements made by the issuers of those securities. The estimates project possible future interest and dividend payments based on the number of bonds or shares held in your account at the time the estimate was done. Your actual investment income may be higher or lower than the estimated amounts. Estimates for certain types of securities that have a return of principal or capital gain may be overstated. Income being reinvested is indicated with '*'. Income cannot be estimated for the securities indicated by '**'. It cannot be estimated because the annual payment amount or frequency is not available at this time.

Estimated Yield

The Estimated Yield (EY) in the preceding sections(s) compares the anticipated earnings on your investments in the coming year to the current price of the investments. It is based on past interest and dividend payments made by the securities held in your account. Changes in the price of a security over time or in the amount of the investment held in your account will cause the EY to vary. The EY is only an estimate and cannot be guaranteed by Edward Jones or the issuers of the securities. Your actual yield may be higher or lower than the estimated amounts. Estimates for any securities that have a return of principal or capital gain may be overstated. Income cannot be estimated for any securities that do not have an annual payment amount or frequency available at this time.

Our Advice on Inflation

Rising prices can be concerning because you must find ways to increase your income to afford the same standard of living. But the first step is to not overreact. We believe that if you own a well-diversified portfolio of quality investments, you may not need to do anything differently because you probably have an appropriate amount of fixed income and quality dividend-paying stocks. To learn more, visit www.edwardjones.com/inflation to watch our video clip "Putting Rising Prices into Perspective."

The Market Has Recovered: What's Next?

After two years of solid market gains, you may be wondering what comes next. We believe stocks have support to rise further, but it's important to maintain realistic expectations and expect a few bumps in the time ahead. Historically, the market drops 10% about once a year, so don't be surprised. To put that into perspective, if the Dow Jones Industrial Average (Dow) is about 12,000, a 10% correction would be a 1,200-point drop. While this may seem like a significant drop, especially after the volatile times of the past few years, we don't believe it's a reason for alarm or to abandon a long-term approach.

Reasons for Optimism -- While market pullbacks can occur at any time for any reason, we don't believe you should move to the sidelines or wait to invest. Instead, we recommend you:

- Consider using any broad price declines to rebalance and add attractive investments, such as quality stocks, at lower prices
- Own an appropriate mix of quality stocks and bonds, and keep a long-term perspective with realistic expectations rather than getting caught up in daily price moves

Over the long term, stocks tend to follow the growth of the economy and corporate earnings, which are improving. However, in the short term, investor emotion can heavily influence them. Currently, that pendulum has swung back from fear toward the center, as investors remain wary but are becoming anxious that they've missed out and may feel the need to be aggressive to catch up.

Since we haven't had a short-term pullback in a while, the risk has increased. However, don't ignore the good news about the strength of corporate America and the growing economy. You're likely to find that easier to do if you own a well-diversified portfolio of quality investments that include an appropriate mix of stocks and bonds.
