Outlook 2015: Five Steps to Start the New Year

We think the outlook for 2015 is good, but we also know that conditions can change quickly. One way to help stay on track in any market is to have a clear destination for your financial journey, with guideposts to point the way.

1. Stocks Can Fuel Portfolios
We think the economy and company earnings should continue to grow at modest rates, pushing stock prices higher over time. Of course, stock performance is not guaranteed, and markets can rise and fall at any time and for any reason. We believe stocks look attractive and recommend adding large-cap stocks if appropriate and reducing small-cap stocks as needed to position your investments for the long term to help you toward your goals.

2. Prepare for Rising Interest Rates
We think short-term interest rates will rise slowly after mid-2015 unless economic conditions change unexpectedly. Prepare for rising interest rates with a laddered bond portfolio, owning investment-grade bonds with short-, intermediate- and long-term maturities. Reduce high-yield bonds to no more than 5% of your portfolio.

3. Look Abroad for Opportunities
Many countries added or reinvigorated growth policies in 2014. Interest rates fell, stocks worldwide rose, and the U.S. dollar strengthened compared to most foreign currencies. We think these policies are likely to continue until economic growth picks up. Consider adding broad-based international equity investments to your portfolio, if appropriate. We believe they should benefit as economic growth starts to rebound. Low interest rates combined with a rising U.S. dollar could make foreign fixed-income investments less attractive, so we suggest reducing those investments, if needed.

4. Pace Yourself
Investing more in stocks increases risk, but too little may mean you don't have enough time to reach your destination. Rebalance your portfolio if needed to an appropriate mix of stocks and bonds for your situation and risk tolerance.

5. Don't Take Detours
Don't be misled by promises of high returns without risk or "must-have" investments claiming to protect against predicted "disasters." The time-tested strategy of owning quality investments and staying invested in them is more likely to help you reach your financial goals.

No matter where you're at in your financial journey, your financial advisor can help make sure you're on the right track. There may be some rough patches along the way, but we believe there are opportunities today to help to work toward your long-term goals.

Before investing, make sure you understand the risks involved. Share values will fluctuate with changing market conditions, and you may lose principal. Bond values will generally decline in a rising interest rate environment. Dividends can be increased, decreased or eliminated at any point without notice. Special risks, including those related to currency fluctuations and foreign political and economic events, are inherent to international investing.
